

# Quick-Start Guide for Full CHTS Dataset Result

- ❑ Find the and download the zip file PVC-Public.zip in the folder [github.com/khamza075/PVC/tree/main/public\\_compiled/](https://github.com/khamza075/PVC/tree/main/public_compiled/)
- ❑ Unzip the downloaded file, we will refer to the unzipped sub-folder “PVC-Public” as PVC-root
- ❑ Download the Pre-Analyzed Result for Full CHTS Dataset from: [https://drive.google.com/file/d/1JbikgDRTLnnE6HA\\_8kIVl-WYVAYk-afZ/view?usp=sharing](https://drive.google.com/file/d/1JbikgDRTLnnE6HA_8kIVl-WYVAYk-afZ/view?usp=sharing)
- ❑ Unzip the Pre-Analyzed Result, then copy the folder named sampleVehicles\_fullCHTSResult into PVC-root
- ❑ Locate and double-click the .jar file, the Main Panel of PVC software should appear
  - In the Main Panel, the bottom three buttons offer various perspectives on how to view the results
  - If not, please refer to Installation & System Requirements Section of the User-Guide
